Nationwide Fencing Supplies Ltd

Timber Knee Rail

Product Overview

Nationwide's Timber Knee Rail system, also known as birdsmouth and diamond rail, is a popular, low cost, long term solution, ideal for demarcation or around car parking areas. It is particularly popular at schools, alongside footpaths, and at sports fields and play areas.

All timber supplied is factory tanalised treated providing a long lasting low maintenance fencing solution that does not require immediate on site finishing.

Technical Specification

- **100x100mm Timber Posts.**
- **100x100mm Timber Rails.**
- **Galvanised birdsmouth strap.**

Features

- **High Quality Timber**
  All timber supplied is factory tanalised treated and benefits from a natural aesthetic.
- **Low Cost**
  Benefits from a very simple design and is constructed on-site, so it is quick and easy to install.
- **Solid Construction**
  Timber knee rail posts are secured in ground into solid concrete foundations with galvanized birsmouth straps holding the rail in place.
