

Product Overview

Nationwide Palisade is one of our most popular choices for perimeter security, offering an intimidating and highly durable boundary which provides excellent protection against climbing, vandalism and attack.

Comprising spiked topped and cut resistant pales manufactured from cold rolled steel, and secured with anti-tamper fixings, our Palisade system is available in a number of different pale profile options and thicknesses to suit your specific security requirements.

Features

- **Government Compliance**
Compliant to BS 1722-12.
